

Indux AAA Wet Scrubbers

Air and gas scrubbers specifically designed for each application, allowing for your particular situation, whether it be, dusts, fumes, odors or gases.

indux[®]

Environmental Filtration

Australian Designed and Built

Indux IS34k at SITA Badgery's

Indux's 25 years of experience in the design, manufacture, and installation, of thousands of clean air systems, combined with a ongoing research and design, has produced heavy duty, clean air systems that perform, have low running costs and have minimal maintenance costs.

Indux's range of air and gas scrubbers are specifically designed for each application, allowing for your particular situation, whether it be, dusts, fumes, odors or gases.

Filtration by scrubber provide filtering the contaminated air without the risk of static build-up by dry fabric type dust collectors. Due to the filtering by scrubber action, dust does not obstruct the airflow.

IS3400, at LMCC

Lesni FRP at BOC Wagga

Types of Scrubbers:

- Particulate centrifugal.
- Flooded disc.
- Fixed venturi.
- Adjustable venturi.
- Packed tower.
- Dynamic.

Features including:

- Moisture eliminator panels.
- Heavy duty pumps, with hard face seals.
- Fan Motor Control Panel with Electrical interlock for pump protection.
- Over flow valve.
- Make up water Valve
- Service Agreement.

Options available:

- Construction materials, Stainless Steel, Mild Steel, UPVC, or Fiberglass.
- Sight gauge.
- ph sensors.
- Chemical feed/dosing for ph balance.
- Pump strainers.
- Mud conveyor for heavy dust loads.
- Pre-separators.
