

Indux Model UMF/IMF Shaker Dust Collectors
Industrial Grade & Robust Construction
Economical to Purchase & Operate
Specially Designed & Manufactured for the
Timber Industry

indux[®]

Environmental Filtration

Australian Designed and Built

UMF 84

The **UMF/IMF** series of dust collectors provide very effective and economical solutions to a wide variety of industrial dust problems.

The range is modular from (1) to (9) modules for very heavy dust loads (IMF1-IMF9), and compact packaged units for workshops, laboratories, educational institutions and restricted spaces (UMF12-84).

UMF 24

Featuring:

- High dust load rated filter socks
- Premium grade long life filter material (up to 10 years)
- 99% Efficient filtration down to 1 micron dust particles
- Big bore filters specially for the Timber Industry
- Choice of inlet and outlet to any three sides.
- Automatic filter cleaning system electronically activated every time the fan is switched off. Maintaining filter at its most efficient
- Constructed from prefabricated galvanised steel panels or optional powder coated galvanised steel panels for good corrosion resistance
- Variety of options for dust bins and hoppers
- Safety by design minimising risk of fire
- High efficiency aerofoil fans, with non-sparking fan impellers saving power and money with Indux
